PUBLIC TALK

**Durian Cultivation:  
Risk, Opportunity and Career**

2<sup>ND</sup> OCTOBER 2019, WED 2.00 P.M. - 3.00 P.M. A2#101

Mr. Lim Chin Khee

Research Interest:  
Durian Cultivation

**Speaker Introduction**

Mr. Lim graduated with a degree of Bachelor of Science in Agriculture from University of Agriculture of Malaysia and has 20-years hands-on experience in cultivation of durian and tropical fruits. He is durian advisor to many organizations and frequently conducts trainings, presentations and workshops about cultivation of durian.

**Abstract**

**Part 1: How much do you know about durian, the king of fruits?**

The durian tree can bear fruits in 3 years, and the life span of the tree can last for hundreds of years. The taste of durian is affected by the fertilizer. For example, we can control the bitterness, sweetness, seed size, and husk thickness of durian fruit. Durian flesh can be colourful, some species are thornless.

**Part 2: durian as an emerging business opportunities**

Durian is one of the most famous and controversial fruits in the world. It is highly valued and appreciated throughout Southeast Asia and China. In the past five years, the export volume of durian from Malaysia has increased significantly and is expected to grow further. Small growers and large companies are interested to cultivate durian on a commercial scale to meet rising demands. Durian farming can be a tourist attraction (i.e., agro-tourism) to create jobs for Malaysians.

Don't miss this opportunity to learn some durian related business opportunities from Malaysia's durian expert, Mr. Lin Chin Khee
